## SUMMARY

I am a high school student (Class of 2016) who enjoys computer programming and electronics in general. I most enjoy game development, however I am almost as passionate about web development. I also love attending hackathons (24-48 hour programming events); they are great opportunities to learn a huge amount of knowledge in a relatively short amount of time.

---

## SKILLS

Web Development	Web Design	Computer Program
Electronics	Game Development	JavaScript
PHP	MySQL	MongoDB
C++	Python	Java
HTML	CSS	Node.js
Long Distance Running	Trail Running	Spanish

---

## EXPERIENCE

### UserSource

06 / 2013 - 10 / 2013

*Mobile Application Developer*

I was in charge of the development of the front end of a mobile app. I was a member of a team of three international students, supervised by UserSource founder David Kennan. I created the main UI for the project using jQuery Mobile and optimized the app for Android using Phonegap and the Android SDK.

---
